I. The over-all quality of the peripheral photography is fair to good over the target areas with a few scattered clouds on the far obliques. The average slant range distance from the aircraft to the six nearest islands is approximately 16 nautical miles and to the two farthest islands approximately 38 nautical miles.

II. This preliminary report will cover items of military significance in response to requirements levied by the intelligence community.

III. Summary

A search of the photography does not reveal any guided missile sites, submarine bases or new airfields.

Items of significance are the extension of the runway at Tofutsu Airfield to approximately 6,600 feet and the possible extension of the runway at Furukamappu Airfield to approximately 6,600 feet. Also covered are four small naval installations and several small possible electronic sites.
